EXPLORE OUR MODERN WAY TO GROW YOUR BUSINESS

Tariq Shahabedden
Chief Executive Officer

Azdan Business Analytics has undergone a remarkable evolution in the past 10 years as we've pursued our vision to become one of the region's leading consultancy firms. But one of the most profound changes over this time has been the richer understanding of—and deeper commitment to—business advisory and consultancy that has come into focus before technology as we have refined our views of what it means to be a leader.

What is clearer than ever before, though, is that we cannot achieve projects success without Building four equal strong commitments to customers, partners, consultants, and the shareholders. we believe these are the essential prerequisites for maintaining the long-term health and growth of our beloved Azdan.

AZDAN SERVICES

**WHEN THE
ROOTS ARE
DEEP, THERE IS
NO REASON
TO FEAR
THE WIND.**

BUSINESS ADVISORY Our team is fairly well-versed in the functional challenges of any solution's implementation. That's why Azdan proposes a business advisory and consultancy before starting any kind of implementation.

IMPLEMENTATION Azdan Implementation Method is composed of seven proven linked stages, which support the long-term success of the solution deployment, making it easier to provide you a full control during the project lifecycle.

OPERATION After Implementation, you will get the benefit from Azdan fulltime onsite support. Our consultants will accompany your team to make sure that the deployment is running smoothly while eliminating any challenges that may appear in the future.

Automation

WE INCREASE YOUR PROCESS EFFICIENCY

What if you could connect your human workforce with the capabilities of today's Digital Workforce to generate outcomes with greater speed, agility, accuracy, and efficiency? Azdan is deploying Blue Prism's connected-RPA Platform to unleash the human potential and empowering our customers with a new 21st century workforce.

A1 Robotic Process Automation

Azdan is deploying Blue Prism's intelligent and connected-RPA. The platform is designed for business users and developed for IT governance.

Management

WE IMPROVE THE WAY PEOPLE WORK

Azdan is using the top business management solutions in the market to scale with your businesses as you grow and to streamline mission-critical processes. In turn, this allows you to continue focusing on what you do best and to react to new market opportunities swiftly and confidently!

ORACLE®

Performance

WE STREAMLINE YOUR PLANNING & BUDGETING

The Enterprise Performance Management by Azdan refers to the processes designed to help organizations plan, budget, forecast, and report on business performance as well as consolidate and finalize financial results. These processes are not limited to finance office, but other functional areas, such as HR, sales, marketing, and IT, use EPM for operational planning and reporting.

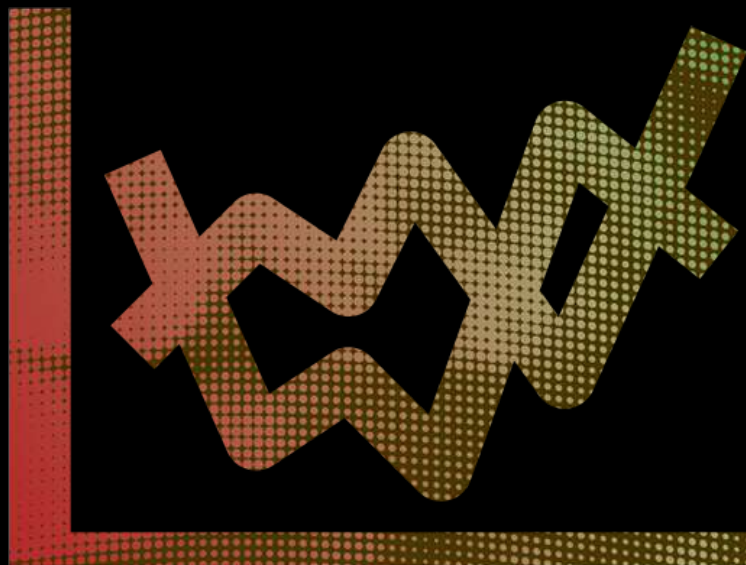

- P1** Planning and Budgeting
- P2** Financial Consolidation

LOCAL RELEVANCE

At Azdan Business Analytics, One of our priorities is to figure out how to offer for our customers an experience that is globally appropriate, while locally relevant

We have very deep experience localizing our solutions and services informed the standards and best practices for how to do this work in a scalable way across our region. Respect for cultural, linguistic and market expectations formed the foundation of our current Global Readiness program.

Today's world of digital services and enterprise solutions requires changes to the traditional localization model, which was created for packaged products. Azdan Business Analytics is localizing specifically each of its solutions for each market where we were offered a product.

Our localization initiatives are not limited to only the Arabic Language, but it reach governmental laws, internal regulations and policies, Value Added Tax, Hijri calendar, and culture,.
