# Oracle NetSuite Financial Management

**The General Ledger (GL)** is for all financial transactions. It provides a complete audit trail of all transactions and allows you to create financial statements such as balance sheets and income statements.

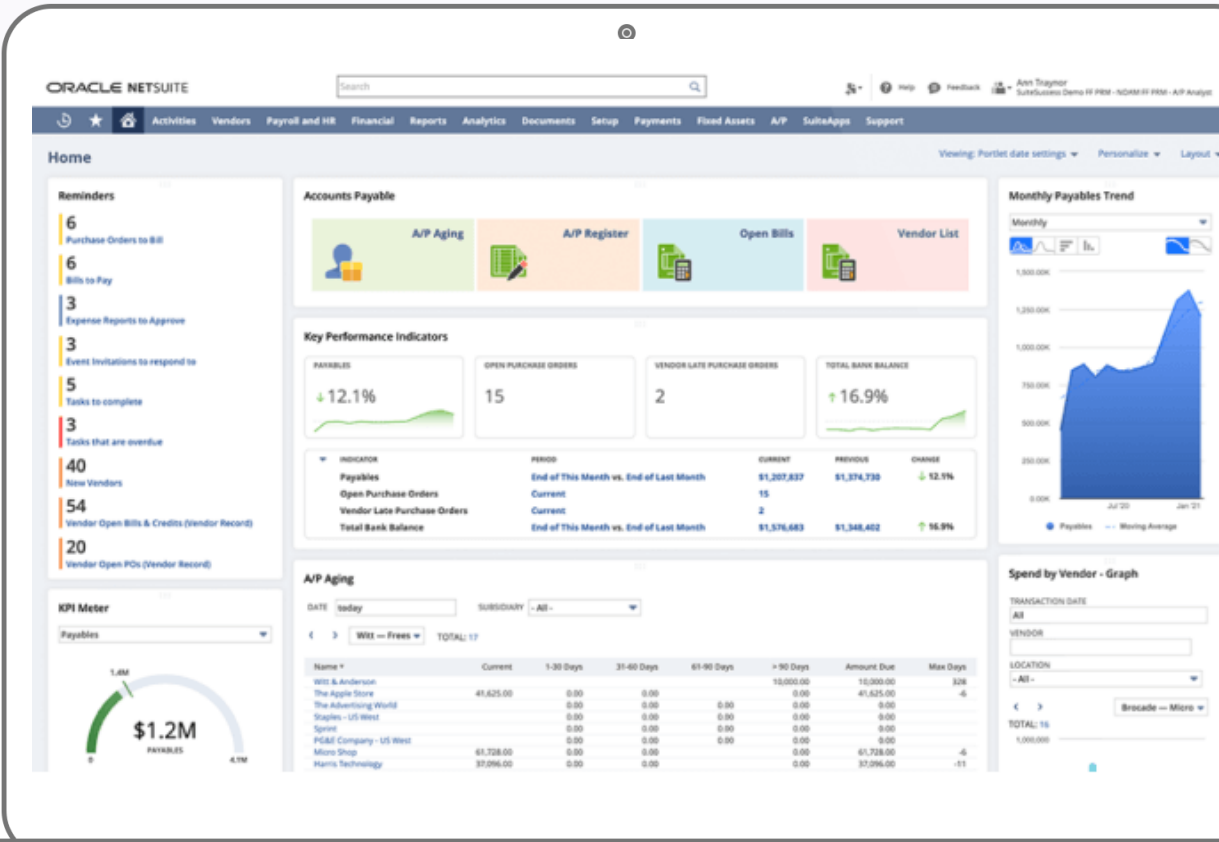

**Accounts Payable (AP)** is used to manage vendor bills and payments. It allows you to track vendor bills, create purchase orders, and manage payments.

**Accounts Receivable (AR)** is used to manage customer invoices and payments. It allows you to track customer invoices, create sales orders, and manage payments.

**Fixed Assets Management** automates the management of fixed assets acquisition, depreciation, revaluation, and retirement, as well as maintenance schedules and insurance.

“ NetSuite Financials is a cloud-based accounting software that provides a suite of financial management applications.

# Oracle NetSuite Supply Chain Management

**Order Management** Manage your orders via phone, online, direct sales or EDI and accurately using wave release and intelligent pick & pack.

**Inventory & Supply Chain** Move your inventory to the right place at the right time.

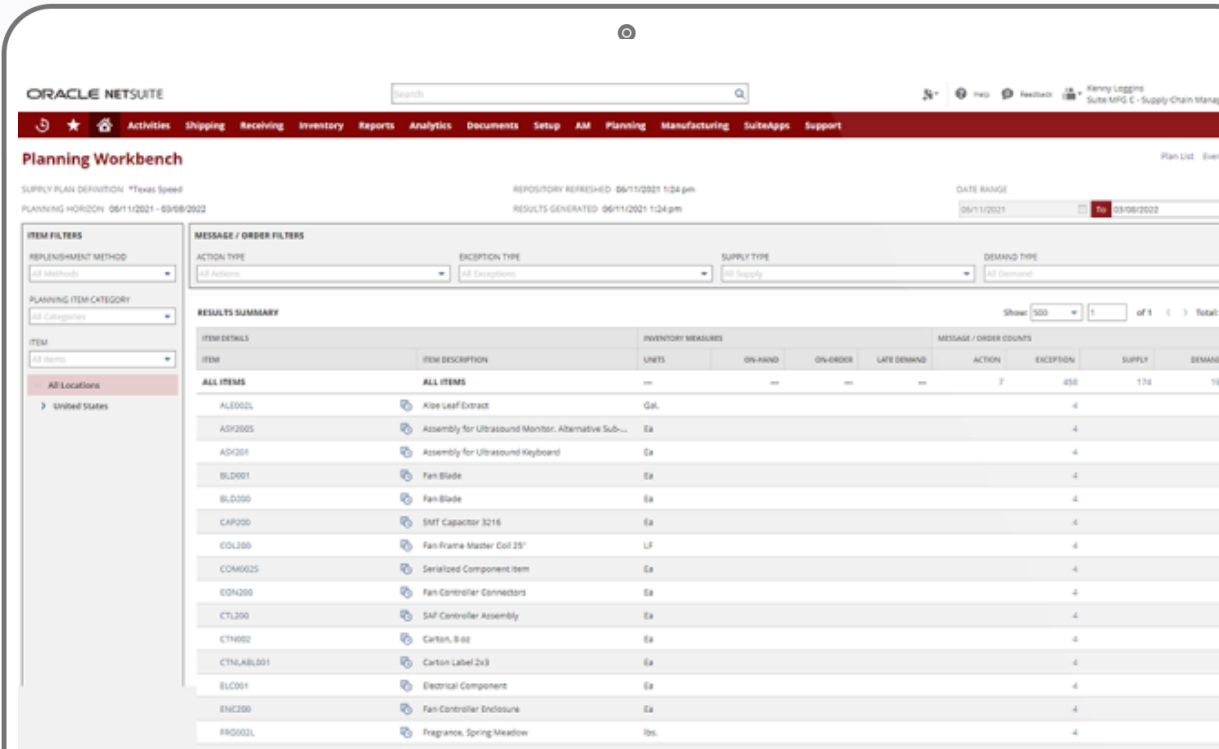

**Source Management** Leverage supplier and vendor relationships using online portals.

**Warehouse Management** Streamline storage with deep metrics and inventory controls.

**Supply Planning** Analyze demand, determine replenishment requirements, add stock and create orders according to an up-to-date supply plan.

“ NetSuite enables you to oversee the flow of goods from suppliers through manufacturing and into customers' hands.

## Oracle NetSuite for Automotive DMS

**Auto Franchise** Managing multiple dealership locations, inventory, sales, and service operations of automotive franchises.

**BHPH & LTO Auto Dealerships** Specialized capabilities for financing and inventory management in Buy Here Pay Here (BHPH) auto dealerships.

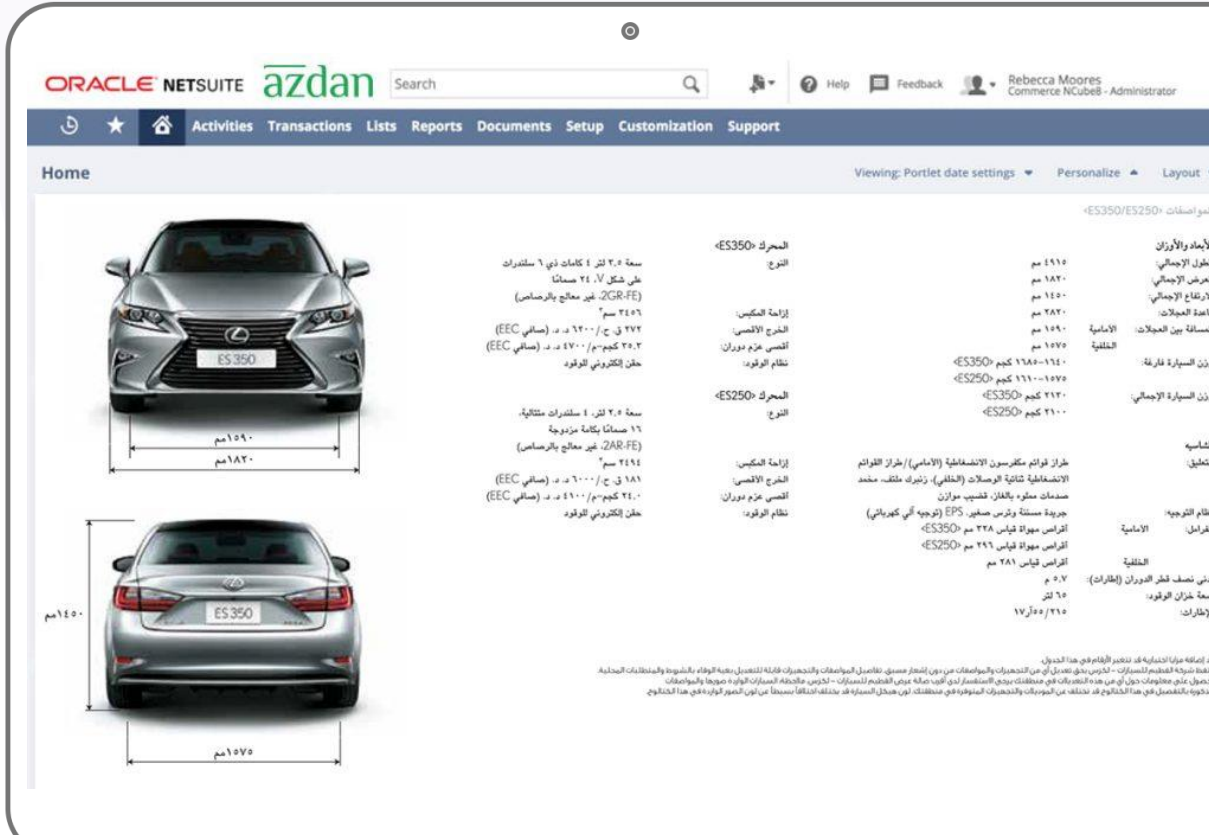

**Heavy Equipment Dealerships** Specialized in inventory, sales, and service in heavy equipment dealerships.

**Heavy Truck Dealerships** Specific functionalities for managing inventory, parts, and service operations in heavy truck dealerships.

**Importers and Distributors** Managing import/export processes, pricing, and distribution networks for automotive importers and distributors.

**Service and Tire Centers** Managing service appointments, work orders, and parts inventory in automotive service and tire centers.

“Complete Dealership Management System for Automotive that is 100% built inside Oracle NetSuite.”

# United Motors

## Azdan Case Study

### Business Situation

They faced a significant challenge in managing their business processes efficiently and effectively. The existing systems and practices were inadequate, leading to delays and errors. This resulted in increased costs, decreased productivity, and dissatisfied customers.

### Results

- Azdan helped UMC integrate data across departments and locations, resulting in a seamless flow of information. This led to a 30% increase in collaboration efficiency.
- UMC gained access to real-time insights and reports, enabling agile decision-making. This resulted in a 25% improvement in decision accuracy.
- Through data integration and real-time access, UMC experienced a reduction in process delays, leading to streamlined operations.
