- Quality Management
- Manufacturing Execution System

Oracle NetSuite Financial Management

The General Ledger (GL) is for all financial transactions. It provides a complete audit trail of all transactions and allows you to create financial statements such as balance sheets and income statements.

Accounts Payable (AP) is used to manage vendor bills and payments. It allows you to track vendor bills, create purchase orders, and manage payments.

Accounts Receivable (AR) is used to manage customer invoices and payments. It allows you to track customer invoices, create sales orders, and manage payments.

Fixed Assets Management automates the management of fixed assets acquisition, depreciation, revaluation, and retirement, as well as maintenance schedules and insurance.

MetSuite Financials is a cloud-based accounting software that provides a suite of financial management applications.

Oracle NetSuite Supply Chain Management

Order Management Manage your orders via phone, online, direct sales or EDI and accurately using wave release and intelligent pick & pack.

Inventory & Supply Chain Move your inventory to the right place at the right time.

Source Management Leverage supplier and vendor relationships using online portals.

Warehouse Management Streamline storage with deep metrics and inventory controls.

Supply Planning Analyze demand, determine replenishment requirements, add stock and create orders according to an up-to-date supply plan.

MetSuite enables you to oversee the flow of goods from suppliers through manufacturing and into customers' hands.

Emirates Transport Azdan Case Study

Business Situation

Emirates provides various services to government, federal, and local entities as well as private sector organizations. They had no integrated system for budget analysis and execution, relying exclusively on old legacy systems.

Results

az

They achieved alignment of budget consumption with financial forecasts.

- They successfully avoid budget overruns, ensuring that 100% of their financial health is closely monitored.
- The implementation enables real-time tracking, allowing them to efficiently manage their budget and maintain financial stability.
- By achieving 100% alignment, they significantly reduce the risk of exceeding budget limits, ensuring a healthier financial position.
