Oracle NetSuite Financial Management

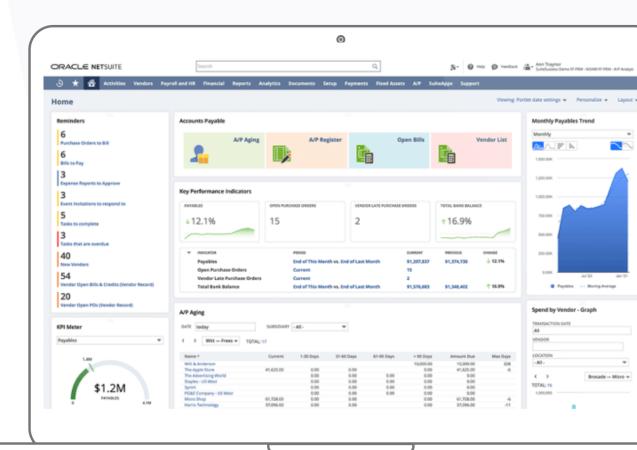

The General Ledger (GL) is for all financial transactions. It provides a complete audit trail of all transactions and allows you to create financial statements such as balance sheets and income statements.

Accounts Payable (AP) is used to manage vendor bills and payments. It allows you to track vendor bills, create purchase orders, and manage payments.

Accounts Receivable (AR) is used to manage customer invoices and payments. It allows you to track customer invoices, create sales orders, and manage payments.

Fixed Assets Management automates the management of fixed assets acquisition, depreciation, revaluation, and retirement, as well as maintenance schedules and insurance.

MetSuite Financials is a cloud-based accounting software that provides a suite of financial management applications.

Oracle NetSuite Supply Chain Management

Order Management Manage your orders via phone, online, direct sales or EDI and accurately using wave release and intelligent pick & pack.

Inventory & Supply Chain Move your inventory to the right place at the right time.

Source Management Leverage supplier and vendor relationships using online portals.

Warehouse Management Streamline storage with deep metrics and inventory controls.

Supply Planning Analyze demand, determine replenishment requirements, add stock and create orders according to an up-to-date supply plan.

MetSuite enables you to oversee the flow of goods from suppliers through manufacturing and into customers' hands.

NetSuite – 3rd Party Integration Integration App

Prebuilt integration to automate Order to cash processes and Point of Sale between NetSuite and 3rd Party Apps.

azdan

Comprehensive flows out-of-the-box Automate order-to-cash across sales, inventory, finance, and much more.

Self-service with low maintenance Built for both IT & end-users, the Azdan connector lets operation teams stay in your solution, while finance stays in NetSuite.

Customizable and expandable Azdan offer accelerator that connect different applications and optimize your existing NetSuite environment.

Dole Azdan Case Study

Business Situation

Dole Middle East is a subsidiary company of Dole, a global fruit and vegetable company with hundreds of years of experience. The finance team used to manually collate ERP data into spreadsheets for analysis. this process was time-consuming and error-prone, creating difficulties to analyze and understand real business performance.

Results

- Implementation of Oracle Planning and Budgeting Cloud Service resulted in significantly improved data integrity and reliability for forecasting.
- Manual spreadsheet usage for forecasting was replaced, leading to a notable increase in the accuracy and trustworthiness of the data.
- The transition to Oracle Planning and Budgeting Cloud Service resulted in a data integrity improvement of up to 95%.
