Oracle NetSuite Financial Management

The General Ledger (GL) is for all financial transactions. It provides a complete audit trail of all transactions and allows you to create financial statements such as balance sheets and income statements.

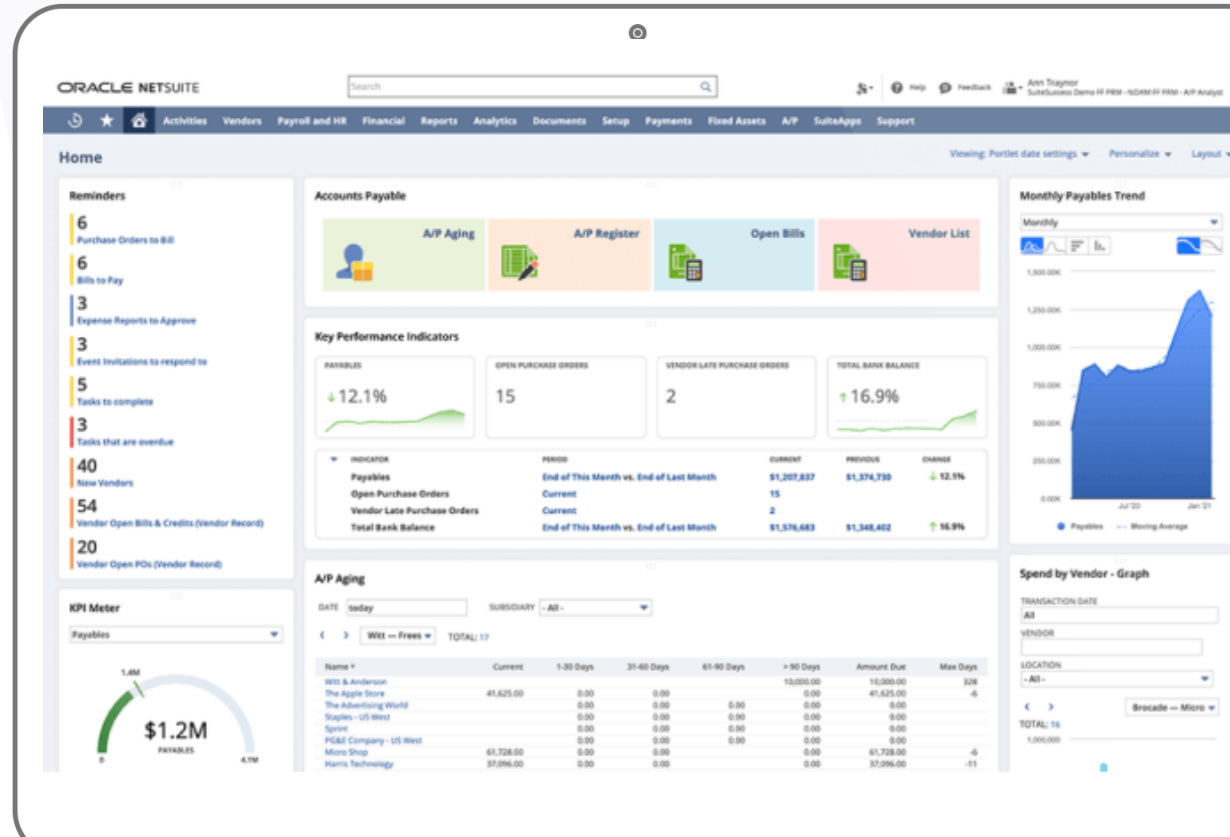

Accounts Payable (AP) is used to manage vendor bills and payments. It allows you to track vendor bills, create purchase orders, and manage payments.

Accounts Receivable (AR) is used to manage customer invoices and payments. It allows you to track customer invoices, create sales orders, and manage payments.

Fixed Assets Management automates the management of fixed assets acquisition, depreciation, revaluation, and retirement, as well as maintenance schedules and insurance.

“ NetSuite Financials is a cloud-based accounting software that provides a suite of financial management applications.

NetSuite for IT/Software companies

Discover Sales Opportunities Organize visits and meetings, track upcoming payments

Project Accounting Ensure accurate accounting & billing throughout the project.

Timesheet Management Enables users to quickly and easily capture detailed timesheets.

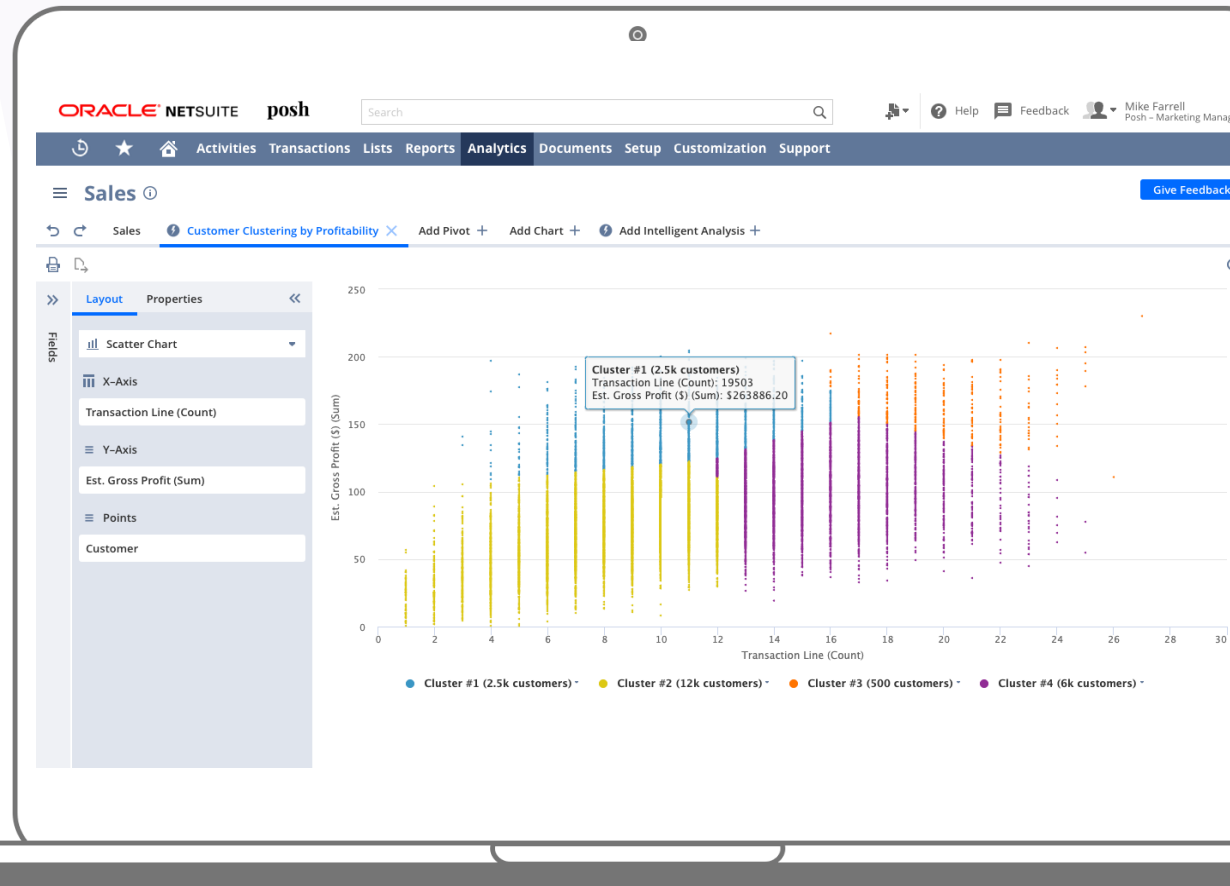

Resource Management Enables project managers to optimize staffing and utilization.

Improve Project Profitability. Review timelines, resource needs and profitability to develop more accurate quotes.

Business Intelligence Unleash NetSuite Analytics or integrate with your BI tool.

“ NetSuite's ERP gives you a real-time view into opportunities, resources and financials that will let you deliver service engagements.

Foodics

Azdan Case Study

Business Situation

Foodics experienced significant challenges including increased costs, operational inefficiencies, and delayed time-to-market. These issues stemmed from their reliance on manual processes, and data silos, resulting in higher expenses, difficulties in streamlining operations, and slower product launches.

Results

Azdan's assistance enabled Foodics to achieve significant business scalability and process optimization:

- By leveraging Azdan's solution, they experienced a notable reduction in costs and risks, leading to cost savings of 17%.
- The implementation of Azdan's solution allowed them to start operating faster, with a reduction in time-to-market by 20%.
